

Project Design Phase

Problem- Solution Fit Template

Date	02 NOV 2025
Team ID	NM2025TMID06137
Project Name	Laptop Request Catalog Item
Maximum marks	2 Marks

Problem-solution Fit Template:

Employees and students often require laptops for academic and operational activities. The current request process is either manual or inefficient, leading to delays, lack of transparency, difficulty tracking requests, and inconsistent approval workflows.

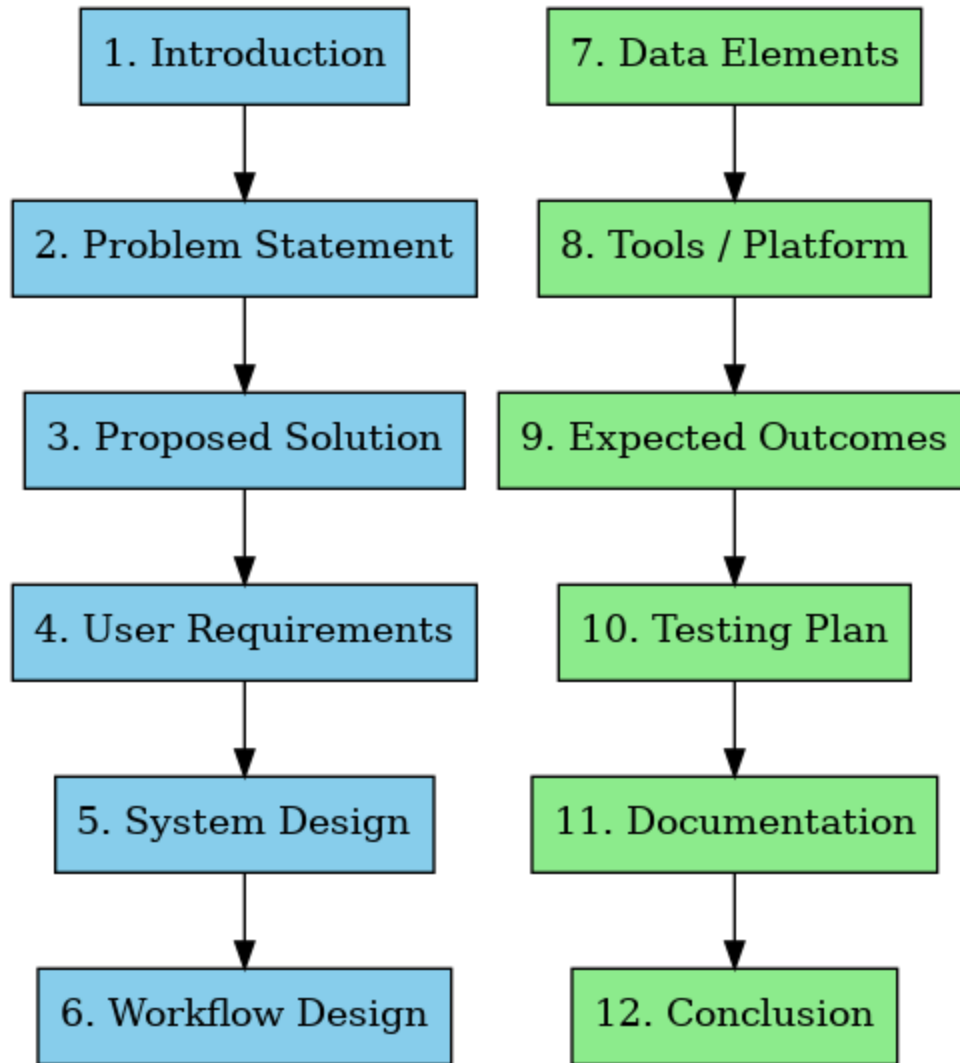

Purpose:

The purpose of this project is to design and implement a Laptop Request Catalog Item on the ServiceNow platform for a university environment.

The solution will streamline the laptop request process by providing a user-friendly form, automated approval workflows, and fulfillment tasks for the IT department.

It aims to enhance operational efficiency, improve service delivery, and contribute to IT service management best practices within an educational setting.
