

Project Design Phase

Solution Architecture

Date	02 NOV 2025
Team ID	NM2025TMID06137
Project Name	Laptop Request Catalog Item
Maximum marks	4 Marks

Solution Architecture:

Project Goals

- Automate the laptop request and approval workflow
- Provide a self-service portal for users to submit requests
- Enable IT staff to manage, assign, and track laptop assets efficiently
- Ensure transparency through status tracking and email notifications
- Maintain audit compliance and request history for institutional governance

Key components:

Component	Role
ServiceNow Service Catalog	Entry point for submitting laptop requests

Catalog Form	Collects request details such as justification, laptop type, and duration
Workflow / Flow Designer	Automates approval routing and notifications
User Roles & Permissions	Controls access for users, approvers, and IT staff
ITSM / Asset Module	Tracks issued laptops and asset lifecycle
Notification Engine	Sends automated alerts for approval, assignment, and closure

Development Phases

Phase	Description
Requirement Gathering	Understand user roles, request flow, approval hierarchy
Form Design	Build Service Catalog item and request form fields
Workflow Development	Configure automated approval and task assignment

Integration with Asset
Module

Link request to laptop inventory

Testing & Validation

UAT, workflow validation, notification checks

Deployment & User
Training

Rollout and guide users on request submission

Solution Architecture Description

The solution uses the ServiceNow platform to deliver an automated laptop request system. Users access the request form through the Service Catalog and submit required details. The ServiceNow Flow Designer triggers an approval workflow based on the requester's department or role. Once approved, a fulfillment task is generated for the IT department, which assigns an available asset and updates the system. The user receives real-time notifications throughout the process. Asset assignment links directly to the IT asset repository, ensuring accurate tracking, audit readiness, and streamlined lifecycle management.

Example:
